

TABLE 1
Percentage of Adolescents Using Cigarettes or Cigarillos
in 8th, 10th, and 12th Grade, 2015

	30-Day Smoking Prevalence <u>Based on Cigarettes Only*</u>	30-Day Smoking Prevalence <u>Based on Cigarettes and Cigarillos</u>	<u>Weighted N</u>
8th Grade	3.7	6.6	4299
10th Grade	5.7	9.8	4839
12th Grade	11.1	17.8	3968
8th, 10th, and 12th Grades Combined	6.7	11.2	13107

Source. The Monitoring the Future study, the University of Michigan.

*These estimates of 30-day smoking prevalence are based on a subset of questionnaires that included questions on both cigarette smoking and cigarillo use. They vary slightly from MTF estimates of 30-day smoking based on all questionnaires (the questions on cigarette smoking are on all questionnaires).
